# Adding Text/Subtitles to Obscure Watermark Template

## 1. Upload Video

- **Action:** Upload your video to an editing app of your choice (e.g., TikTok, CapCut).
- **Details:** Ensure the video is loaded and ready for editing.

## 2. Select Text Style

- **Action:** Choose a text style with a background color (e.g., black-background-white-text or white-background-black-text).
- **Details:** Ensure the style contrasts well with the video for visibility.

## 3. Position Text

- **Action:** Place the text or subtitle over the area where the watermark is located.
- **Details:** Adjust the placement to cover the watermark area. Be mindful of the

watermark's movement and adjust the text position accordingly.

## 4. Save and Export

- **Action:** Save your changes and export the video.
- **Details:** Review the final video to ensure the watermark is obscured effectively.

## 5. Review and Share

- **Action:** Play the exported video to check for any remaining watermark visibility.
- **Details:** If satisfied, share the video on your desired platform.

Feel free to download and use it as needed!
